

TIME TO TAKE THE RIGHT DECISION

National staff have always played a vital role in the sustainability of the missions of humanitarian organizations. They are also those who are much more at risk for safety incidents, and yet for years we have seen an inequality in who receives safety trainings among staff...

At PMO Security Risk Management, we understand the challenges surrounding access to trainings, and feel we have a duty to in make them accessible to everyone.

Therefore, we offer 4 types of contextualized security awareness & skills trainings on location (at an affordable price) to increase the accessibility of trainings to all levels of staff.

Security Awareness & Skills Trainings:

2-day Security Awareness all staff ● 2-day Security Awareness for drivers ● 1-day for Security Advisors, Focal Points, and Managers ● 1-day Crisis & Incident Management

In Fall 2021, we trained over 110 Lebanese staff in Lebanon including drivers, senior management, local partners, etc. We were able to do this at a competitive price while maintaining a high-quality standard. We built a team that includes Lebanese trainers and support staff with current and relevant field experience to help us create recognizable and contextualized scenarios in our trainings.

COURSE DESIGN
