

Training is NECESSARY to prepare well...

The unprecedented use of violence against civilians in Ukraine has caught us all by surprise. The humanitarian needs are staggering and the humanitarian response is in full swing. However, with the speed of the response, comes also the lack of personal preparation and consent.

PMO has designed the Armed Conflict Awareness Training (ACAT), a one-day training that focuses on how to remain as safe as possible while operating in a direct combat zone such as what we are currently seeing in the majority of Ukraine.

Armed Conflict Awareness Training

We believe strongly in the need to make trainings more equally accessible while maintaining a high-quality standard. As such, we only work with certified trainers with current and relevant field experience. We use this experience to create, for your staff, recognizable and contextualized scenarios in our trainings.

COURSE DESIGN

- **Armed conflict: Attack by air, small arms fire, shelling**
- **Concealment and protection: vehicles, nature, structures, protective gear and its limitations**
- **Driving & Travel in a hostile environment**
- **Communication**
- **IHL: Dealing with combatants, visibility, distinction and compliance**
- **Medical Emergency**
- **Mines and Explosives**

28 March – 1 April every day!

Boratyń (25 km from Przemyśl, 48 km from Krakovets border.)

€250 pp
